

901 *Custom*

DNA 901 Custom

Designed and built by the DNA Boats Team,

This is a robust and comfortable vessel built for extended cruising along New Zealand's Top of the South Coastline, Marlborough Sounds, and the rugged West Coast.

The boat prioritizes comfort, range, and functionality. Its heavy construction ensures a smooth ride, while the curved front glass windscreen provides excellent visibility.

The boat features four berths, cooking facilities, a fridge, and a toilet with a shower (hot and cold water system).

With generous deck space, 360-degree walk-around access, and ample storage,

This 901 Custom is well-equipped for overnight stays and long-distance exploration.
